

THE "WORLD'S MOST LIT POINT OF SALE SYSTEM"

8/22/23

Selling Flower Deli Style

"Deli style" means that you buy flower in bulk and weigh out small portions for each purchase, like when you buy cold meat by the pound from a deli. To do this in MyBud, you must:

- 1) Put the item in a cannabis department whose name ends in -gm
- 2) Set the price for 1 unit = 0.1 gram

For example, if you are selling the strain All Gas - Unleaded deli style for \$5 a gram, the item setup steps are:

- 1) Create a cannabis department called Flower Deli -gm
- 2) Create an item called All Gas - Unleaded. Put it in the Flower Deli -gm department and set the price = \$0.50.

The Pricebook item card in MyBud would look like this:

Edit Pricebook Item

Basic Info Promotions Quantity Choices Item is a Carton Package List

PLU: 06089

Item Desc: All Gas - Unleaded Size: 0.1 grams

Department: Deli Flower -gm

Variable Price: No
(Price will be set at checkout time)

Price: 1 item for \$0.50

Five digit price: No

Price includes taxes (if applicable): No

Price includes fees (if applicable): No

Fee multiplier (if applicable): 1

Cancel Delete OK

When a sale is made, before scanning the package ID, enter the quantity in grams sold in the following format: \$0.35 = 3.5 grams, \$0.10 = 1 gram, \$0.70 = 7 grams, etc. The quantity in the

basket will say 10x the number of grams actually being sold. So for 3.5 grams the basket quantity will = 35, for 1 gram it will = 10, 7 grams it will = 70, etc.

Here is what a basket for 3.5 grams of All Gas - Unleaded would look like:

You can also set the sizes you would like to sell using Quantity Choices on the Pricebook item card.

- 1) Click Quantity Choices
- 2) Enter in a name for each quantity you would like to sell. The quantity must = 10x the number of grams you are actually selling.

For example, your Quantity Choices in the Pricebook item card might look like this:

Edit Pricebook Item

Basic Info
Promotions
Quantity Choices
Item is a Carton
Package List

New Package

Name:

Quantity:

UPC:

[Add](#)

Name	Quantity	UPC	
0.1 gram	1		edit delete
Eighth	35		edit delete
Quarter	70		edit delete
Half Ounce	140		edit delete
Ounce	280		edit delete

Cancel
Delete
OK

You can name each quantity whatever you like.

When you scan the package ID for the item, you will then be able to choose between whichever Quantity Choices you have set up for that item.

Note: If you use Quantity Choices, MyBud will always default to offer a quantity of 1 and call this option “Single.”

OK

For deli style sales with MyBud, this “Single” will = 0.1 grams. We therefore recommend that you edit the name of this option to be 0.1 Grams. Examples of what the screen will look like when you make that edit follow.

You can sell a size that you have not set up in Quantity Choices, or not use Quantity Choices at all, as described above.

Quantity Discounts Using Promotions

You also can create discounts for any quantity you like using promotions, and for multiple tiers or shelves of flower.

For example, you might have a deli flower shelf within which you sell at the following price breaks:

- 1 gram = \$5
- 1/8 ounce = \$15, a \$2.50 discount
- 1/4 ounce = \$30, a \$5 discount
- 1/2 ounce = \$50, a \$20 discount
- 1 ounce = \$75, a \$65 discount

You can set up these discounts to reflect automatically when you add the given quantity to a basket to checkout a customer.

Combined with Quantity Choices, here is what a checkout of All Gas - Unleaded would look like.

After you scan the item you will get this screen:

From this screen, you choose the quantity you want to sell. Using this same example, if you choose an Eighth, the basket would look like this:
