

THE "WORLD'S MOST LIT POINT OF SALE SYSTEM"

8/10/23

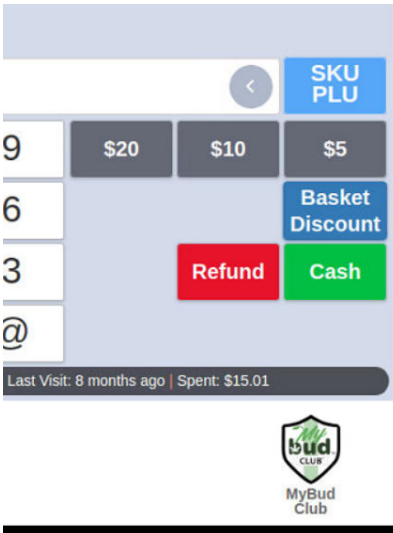

Selling Cannabis Items

For cannabis items, you must checkout by scanning the package ID for each item, not the UPC code (even if there is a UPC barcode on the item's package.)

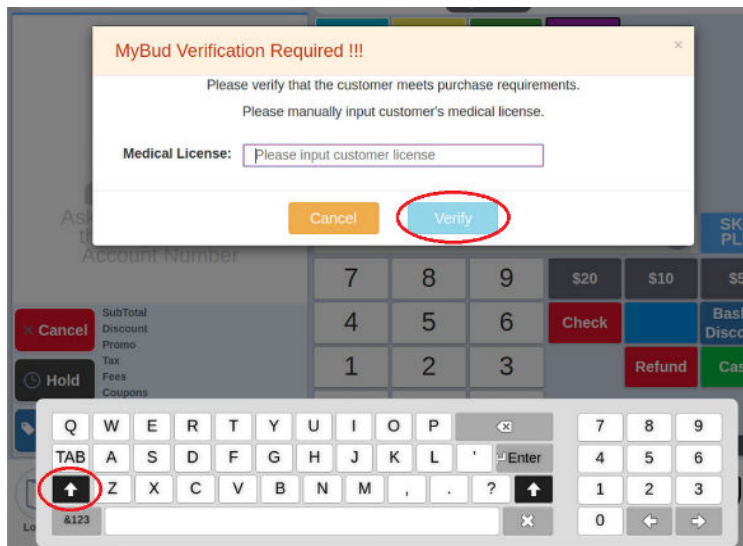

You then will be prompted to enter the patient's MyBud Club Account #, which is the same as their cell phone number. (You can bypass this entry by clicking enter without filling in the phone number.)

A screenshot of a software interface. At the top, it says "A MyBud Club account number has not been provided. Please enter a customer cell phone below." Below this is a label "MyBud Account Number" next to an empty text input field. Underneath the input field is a numeric keypad with buttons for digits 7, 8, 9, 4, 5, 6, 1, 2, 3, and a bottom row with a left arrow, 0, and a 'C' button. At the bottom of the screen are two buttons: "Cancel" (orange) and "Enter" (blue).

You also can see the customer's purchase history by clicking on the MyBud Club shield icon after entering the customer's phone number into the register screen.

You then will see this screen (medical only):

If the patient already has a MyBud Club Account (including one the patient may have created at another store using MyBud as their point of sale system), then the Medical License field will automatically show their patient license ID #. If the patient does not yet have a MyBud Club Account, you will need to enter the patient license ID # manually.

Once you do this, the patient will now be a MyBud Club Account member and you will not need to enter their patient license ID # again.

Note: There is a caps lock feature on the onscreen keyboard (the arrow button will become black with a white arrow inside, see image above) that will make the entry of the patient license ID # easier.

Oklahoma only: The budtender will not see this, but MyBud will also check the website of the Oklahoma Medical Marijuana Authority (OMMA) to ensure that the patient license is active. If it is not active, MyBud will not allow the checkout to proceed. If the license is active, the cannabis item will appear in the basket and the budtender will be able to add more cannabis or non-cannabis items to the basket.
