

THE "WORLD'S MOST LIT POINT OF SALE SYSTEM"

1/24/24

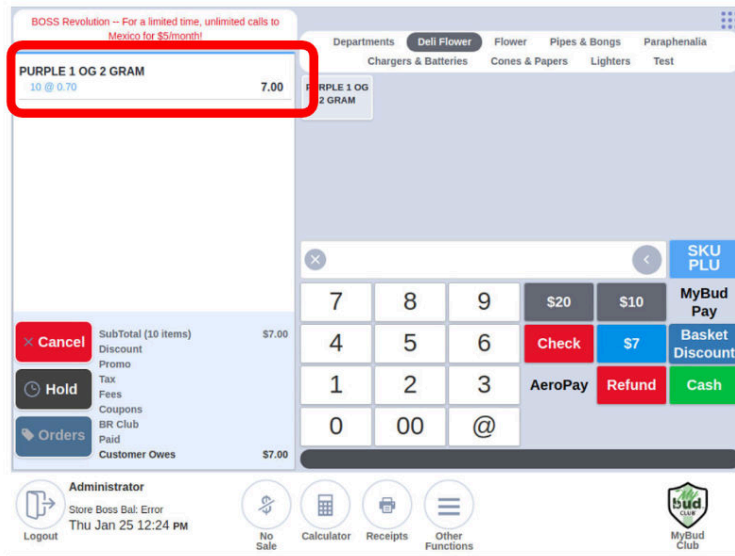

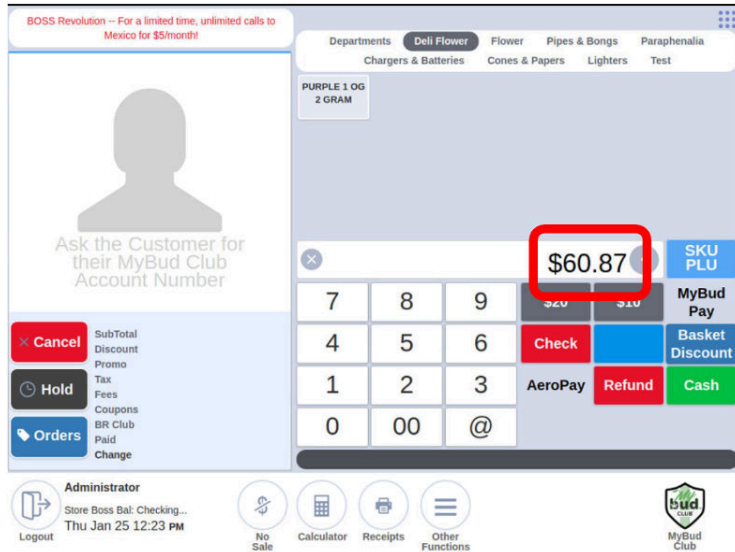

Selling Cannabis Items

Cannabis items are sold in MyBud one of four ways:

- 1) Click the item on the register screen

- 2) Scan the item's package ID
- 3) Scan the item's UPC code* (if available)
- 4) Enter the item's 4 digit* code (if available) and click SKU PLU

You then will be prompted to enter the patient's MyBud Club Account #, which is the same as their cell phone number. (You can bypass this entry by clicking enter without filling in the phone number.)

A MyBud Club account number has not been provided. Please enter a customer cell phone below.

MyBud Account Number

7	8	9
4	5	6
1	2	3
<<	0	C

You then will see this screen (medical only):

MyBud Verification Required !!!

Please verify that the customer meets purchase requirements.
Please manually input customer's medical license.

If the patient already has a MyBud Club Account (including one the patient may have created at another store using MyBud as their point of sale system), then the Medical License field will automatically show their patient license ID #. If the patient does not yet have a MyBud Club Account, you will need to enter the patient license ID # manually.

Once you do this, the patient will now be a MyBud Club Account member and you will not need to enter their patient license ID # again.

If you sell a cannabis item that has multiple package IDs by any method other than scanning the item's package ID, you will be prompted to choose the specific package ID you are selling

If there is only one package ID associated with the item it will automatically sell that single package ID.

Note: There is a caps lock feature on the onscreen keyboard (the arrow button will become black with a white arrow inside, see image above) that will make the entry of the patient license ID # easier.

Oklahoma only: The budtender will not see this, but MyBud will also check the website of the Oklahoma Medical Marijuana Authority (OMMA) to ensure that the patient license is active. If it is not active, MyBud will not allow the checkout to proceed. If the license is active, the cannabis item will appear in the basket and the budtender will be able to add more cannabis or non-cannabis items to the basket.

*To [create a cannabis item](#), you use either a UPC code or create a unique 4 digit code.
